

Safety News

Parents looking to protect youngsters from unsanitary public restrooms should check out the Potty Topper from Neat Solutions of Huntersville, N.C. These specially designed toilet seat covers—launching next month at The Right Start—feature adhesive strips that attach to public toilet seats, creating a barrier between little bottoms and nasty germs. Unlike conventional seat covers, Potty Toppers do not slip off or slide in, making them ultra-secure for safety reasons. Eight individually folded Potty Topper come in a peg-able, poly bag.

(888) 888-4779. ● According to the CPSC, more than 2,000 children are treated in hospital emergency rooms each year from accidents involving electrical outlets. To prevent such

occurrences, Portland, Ore.-based Innovative Safety Technologies has created a patented safety plate called the No Tug Plug, which locks an outlet cord firmly in place. Featuring child-resistant safety doors that act as a “vault” covering the outlet, the No Tug Plug stops little ones from removing the cord and also keeps potential
